

The image shows two surgical instruments. In the top left, a pair of curved microscissors is shown in a circular inset. Below it, a larger instrument, the Ovali Spatula / Scissors, is shown in detail. It has a long, thin handle with a green and pink grip, and a long, thin blade with a curved tip.

Microscissors: Ovali Spatula / Scissors (23 gauge / 0.6 mm)

Article No: 2286.006

Mohamed Tawfik, MD, FRCSEd.
Vitreoretinal Consultant,
MIOR, Egypt

“Having used these 23G curved scissors for more than 5 years, I consider them to be the most precise, effective scissors available. When closed, the blunt edged jaws are ideal to use as a dissector. At the same time, the scissors are exceptionally sharp and the optimal design for cutting fibrous membranes with perfect precision.”
